

Fifth circular

The 32nd Miller Conference on Radiation Chemistry which is organized in cooperation with the International Atomic Energy Agency (IAEA), will be held a month from now, from **3 to 8 June 2023**, in Corsica Island.

The scientific program has been finalized. Also, schedule of presentations is now available online (<https://miller2023.sciencesconf.org>).

Closing date for online registration of all attendees is **3 May 2023**. We call on attendees that have not yet done so, to pay registration fees as soon as possible, and necessarily before the beginning of the Miller Conference. We recall that fees payment should be directly made to Village Club IGESA “La Marana” in Corsica and that means of payment are determined by IGESA (seminaires@igesa.fr, lamarana@igesa.fr) and not by Miller Conference organizers.

Concerning your travel, the most convenient way is to land in Bastia-Poretta airport. Bus shuttles will be provided between Bastia airport and the conference site of “La Marana” on **3 June 2023** afternoon. More detailed information about shuttles schedule will be soon available online. Evidently, it is also possible to take a taxi from Bastia airport to “La Marana” (16 km, 20 min).

For all information regarding location, program, accommodation and events, please visit the conference website (<https://miller2023.sciencesconf.org>).

We look forward to seeing you soon in Corsica Island.

Sophie Le Caër and Samy Remita

Miller Conference 2023 Chairs
