

Third circular

Only four months remain before the opening of 32nd Miller Conference on Radiation Chemistry, which is scheduled for **June 3-8, 2023** in Furiani, Corsica Island, France.

To date, 15 invited speakers confirmed their participation to the Miller Conference. Also, more than 60 abstracts have already been submitted for oral communications or poster presentation. Note that notification of decision on abstract acceptance will occur no later than **February 13, 2023**. Also, the scientific program will be finalized shortly.

We remind you that the deadline for early bird registration is **March 3, 2023**, while registration will be definitively closed on **May 3, 2023**. We thus invite you to finalize your registration as soon as possible.

Thanks to sponsors of 32nd Miller Conference, financial support can be provided to young scientists, less than 32 years old, in order to cover part of their registration fees. Young researchers are then invited to send their request together with their CV to miller2023@sciencesconf.org. Evidently, the amount of the grant will depend on the number of applications received.

For all information concerning important dates, venue, program, accommodation and events, please refer to the Conference website (<https://miller2023.sciencesconf.org>).

We look forward to seeing you all next June in Corsica Island.

Sophie Le Caër and Samy Remita

Miller Conference 2023 Chairs
